

## Press Release

### Code Dx Enterprise Secures Gold for *Government Security News* Homeland Security Awards

**NORTHPORT, N.Y. — February 6, 2018 — Code Dx, Inc.**, provider of an award-winning application security solution that automates and accelerates discovery, prioritization, and management of software vulnerabilities, today announced that it is the Gold winner for the *GSN (Government Security News)* Homeland Security Awards 2017, in the **Best Application Security Solution** category. In 2014, Code Dx was the winner in the Best Compliance/Vulnerability Assessment Solutions category.

“Code Dx is filling a hole in the cybersecurity industry with our application vulnerability correlation and management solutions. We are helping organizations, many of which are government agencies, achieve greater vulnerability coverage and a better assessment of overall software security risk, in less time, and with fewer resources,” said **Anita D’Amico, Ph.D.**, CEO of Code Dx. “We are honored that *GSN* has recognized the innovation offered by Code Dx Enterprise, and the value it brings to its users.”

The *GSN* Homeland Security Awards recognize outstanding research, development, and innovation that took place in Homeland Security throughout the year. Judges of the awards base their selections on a combination of client organization, technological innovation or improvement, filling a recognized IT security need, and the flexibility of a solution to meet current and future organizational needs.

#### **About Code Dx**

Code Dx, Inc. is a provider of an award-winning application security solution that automates and accelerates the discovery, prioritization, and management of software vulnerabilities. The Code Dx Enterprise solution integrates the results of multiple static, dynamic, and interactive Application Security Testing (AST) tools, third-party component analyzers, threat modeling tools, and manual reviews into a consolidated set of results for quick and easy triage, prioritization, and remediation. The core technology was partially funded by Department of Homeland Security Science & Technology (DHS S&T) to help secure the nation’s software supply chain.
